

Gripplle APAK

The Gripplle APAK combines a unique combination of products to anchor your trellising securely. There's no pre-digging or ground preparation required, simply hammer in and engage for a secure anchor that is instantly loaded.

Tried and tested globally in a variety of soil types, the Gripplle APAK gives you the option of a universal end fixing for both wooden and metal posts.

Gripple Anchor

Below ground, the Gripple Anchor creates a strong anchor point that is instantly loaded, performing in a variety of soil types.

GPAK 3

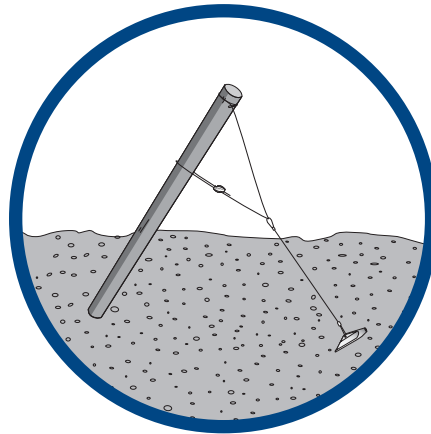

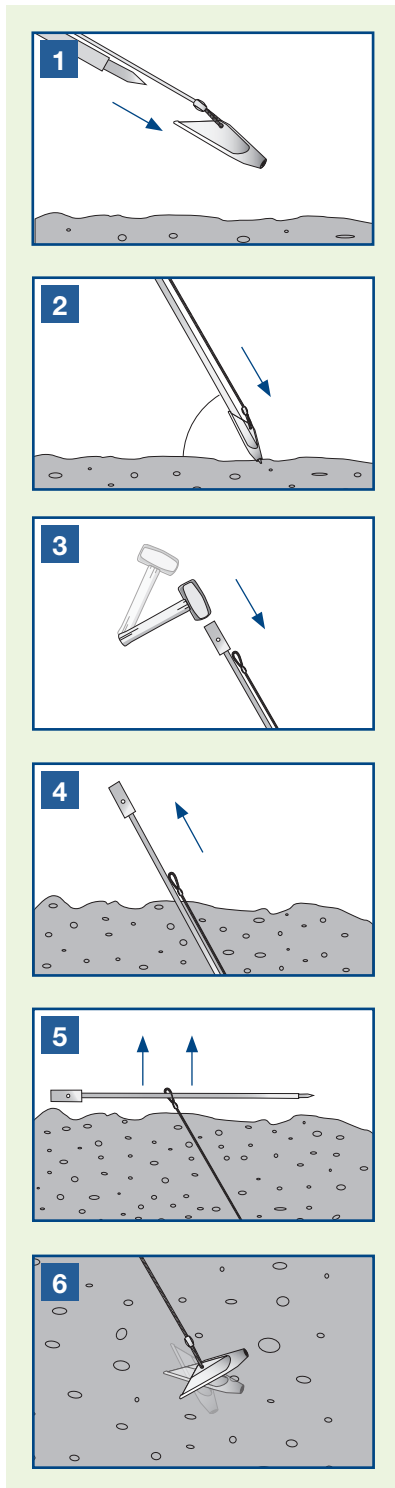

Above ground, The Gripple Plus Anchoring Kit (GPAK) joins the Gripple Anchor to the post with a simple, ready-to-use kit.

Advantages

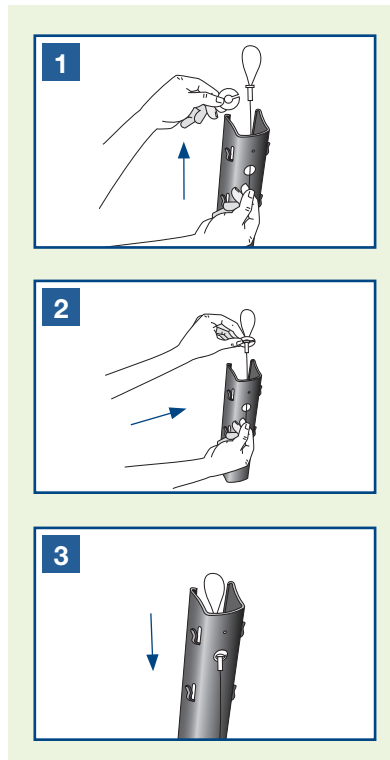

- Includes everything you need to anchor - above and below ground
- Time and labour saving
- Suitable for a variety of soil types
- Universal end fixing for both wooden and metal posts
- Heavy galvanisation for maximum corrosion resistance
- Easily tensioned and re-tensioned with a Gripple Tensioning Tool

The complete anchoring solution

Step 1 - Gripple Anchor

Metal posts

Step 2 - GPAK
